This book examines the prevalence of emotional and behavioral problems in youth and the implications of little or low-quality mental health services available for them. It describes aspects of Positive Behavioral Interventions and Supports (PBIS) and school mental health (SMH) that work together to form a comprehensive service delivery model called the Interconnected Systems Framework (ISF). The term school behavioral health (SBH) is used to describe SMH and PBIS working together, as in the ISF. The book examines perspectives of key stakeholders through a series of research forums, during which participants identified critical themes for the advancement of SBH in South Carolina and the southeast region of the United States. Chapters address key themes of school

behavioral health from these forums, such as collaboration, schoolwide approaches, quality of services, and support for specific populations, including military families and youth involved in the juvenile justice and child welfare systems. The book addresses barriers to providing behavioral health services at school as well as recommendations from key stakeholders for advancing SBH along these critical dimensions. This volume is a must-have resource for researchers, professors, and graduate students as well as practitioners, clinicians, and therapists across such interrelated disciplines as clinical child and school psychology, educational policy and politics, social work, public health, school counseling, family studies, juvenile justice, child and adolescent psychiatry, and child welfare and well-being services.

Viruses that primarily target the lung are very significant causes of death and in the past decade have been responsible for major outbreaks of severe adult respiratory distress syndrome and H1N1 influenza. This book is distinctive in that the entire spectrum of viral disease of the lung is conveniently compiled within a single volume. The epidemiologic, ultrastructural, immunologic, and clinicopathologic features of well-known viral pathogens and newer emergent infectious agents are discussed in detail. After sections on lung defenses and

the taxonomic classification of pneumotropic viruses, the various acute viral infections are considered in a standard format in the main body of the book. Subsequent sections are devoted to the human immunodeficiency virus, viral disease in the neonate and infant, viral infections in the setting of transplantation, and viral-linked tumoral and nontumoral lung conditions. The text is supplemented by numerous color images.

Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.

This book offers a fresh look on a variety of issues concerning herbal medicine - the methods of growing and harvesting various medicinal plants; their phytochemical content; medicinal usage; regulatory issues; and mechanism of action against myriad of human and animal ailments. 'Medicinal Plants: From Farm to Pharmacy' comprises chapters authored by renowned experts from academics and industry from all over the world. It provides timely, in-depth study/analysis of medicinal plants that are already available in the market as supplements or drug components, while also introducing several traditional herbs with potential medicinal applications from various regions of the

world. The book caters to the needs of a diverse group of readers: plant growers, who are looking for ways to enhance the value of their crops by increasing phytochemical content of plant products; biomedical scientists who are studying newer applications for crude herbal extracts or isolated phytochemicals; clinicians and pharmacologists who are studying interactions of herbal compounds with conventional treatment modalities; entrepreneurs who are navigating ways to bring novel herbal supplements to the market; and finally, natural medicine enthusiasts and end-users who want to learn how herbal compounds are produced in nature, how do they work and how are they used in traditional or modern medicine for various disease indications.

This clinical handbook is designed to aid with the fast and accurate diagnosis of cardiopulmonary disease. Chapters are structured to support the clinical decision-making process and cover key points such as differential diagnosis, typical and atypical presentation, co-morbidities, and critical steps that should not be missed. The text also outlines time-dependent interventions, overall principles of treatment, and disease course. Abundant images and links to external audio and video resources reinforce understanding. Although the chapters are organized to provide ready access to essential information, the scope of the book
