At its core, keyword organization is the process of taking your bulk list of keywords and placing each term into meaningful, relevant groups. You can apply any number of verbs to keyword organization, such as clustering, grouping, segmenting and even categorizing. However you describe it, the process is the same.

The Definitive Guide to Keyword Organization

Abstracts are usually followed by a list of keywords selected by the author. The instructions for authors will state how many keywords are required and may even provide a list of recommended keywords. Choosing appropriate keywords is important, because these are used for indexing purposes.

Abstracts and Keywords | Edanz Group

The abstract should provide a quick and accurate summary of the paper, to help the reader decide whether the rest of the paper is worth reading. Keywords ensure that your paper is indexed well by databases and search engines, and thus improve the discoverability of your research. Therefore, keywords should be selected after careful consideration.

This book examines the modules/elements required before implementing knowledge management solutions in typical manufacturing and service industry. The objective is to develop a framework, design and model suitable for all requirements and a strategy to properly implement. Related case studies from organizations are included, with the results provided to use as a solution to problems experienced when implementing knowledge management in the industry. Implementing a knowledge management system can be complex and dynamic, no matter how well planned and developed. Inevitably a degree of organizational inertia is focused on the current state rather than the new. Within an enterprise, personal and group involvement and interests process status and technology landscape can deflect the commitment needed to successfully implement such a system. Cumulative evidence from past research in knowledge management suggests that effective implementation of KM solution in any organization requires a robust designs and models for various critical elements of process, people and technology. Using the techniques provided in this book, readers should be able to design knowledge management strategies, to align objectives of the KM initiatives with their business goals.

This edited book presents scientific and practical recommendations for the successful state and corporate management of regional development under the conditions of the digital economy. These conditions have produced a number of changes. On the one hand, new aspects of regional economies, which require management, are emerging, above all, digital technologies that have to be understood by the population, employees in the labor market, and regional companies. On the other hand, new opportunities for improving practices in the state and corporate management of regional development on the basis of digital technologies are also emerging: e-government systems, digital marketing, online trade, "smart" regions, etc. This book provides an overview of the leading digital technologies and demonstrates how they can be used to improve modern practices in the state and corporate management of regional development in the digital economy. The authors develop the conceptual foundations and put forward practical recommendations. In closing, the authors' conclusions and recommendations are applied to the example of modern Russia, ensuring the practical relevance of the research.

International Conference on Industrial Engineering and Engineering Management is sponsored by Chinese Industrial Engineering Institution, CMES, which is the unique national-level academic society of Industrial Engineering. The conference is held annually as the major event in this area. Being the largest and the most authoritative international academic conference held in China, it supplies an academic platform for the experts and the entrepreneurs in International Industrial Engineering and Management area to exchange their research results. Many experts in various fields from China and foreign countries gather together in the conference to review, exchange, summarize and promote their achievements in Industrial Engineering and Engineering Management fields. Some experts pay special attention to the current situation of the related techniques application in China as well as their future prospect, such as Industry 4.0, Green Product Design, Quality Control and Management, Supply Chain and logistics Management to cater for the purpose of low-carbon, energy-saving and emission-reduction and so on. They also come up with their assumption and outlook about the related techniques' development. The proceedings will offer theoretical methods and technique application cases for experts from college and university, research institution and enterprises who are engaged in theoretical research of Industrial Engineering and Engineering Management and its technique's application in China. As all the papers are feathered by higher level of academic and application value, they also provide research data for foreign scholars who occupy themselves in investigating the enterprises and engineering management of Chinese style.

Progression in sustainable sports practices is an up-and-coming area of research that also has an overarching impact on other professional fields. Analyzing the latest trends and methods in this niche area allows for further advancements in the field of sustainability. This volume presents the proceedings of the CLAIB 2016, held in Bucaramanga, Santander, Colombia, 26, 27 & 28 October 2016. The proceedings, presented by the Regional Council of Biomedical Engineering for Latin America (CORAL), offer research findings, experiences and activities between institutions and universities to develop Bioengineering, Biomedical Engineering and related sciences. The conferences of the American Congress of Biomedical Engineering are sponsored by the International Federation for Medical and Biological Engineering (IFMBE), Society for Engineering in Biology and Medicine (EMBS) and the Pan American Health Organization (PAHO), among other organizations and international agencies to bring together scientists, academics and biomedical engineers in Latin America and other continents in an environment conducive to exchange and professional growth.

This first volume of the Handbook of Asset and Liability Management presents the theories and methods supporting models that align a firm's operations and tactics with its uncertain environment. Detailing the symbiosis between optimization tools and financial decision-making, its original articles cover term and volatility structures, interest rates, risk-return analysis, dynamic asset allocation strategies in discrete and continuous time, the use of stochastic programming models, bond portfolio management, and the Kelly capital growth theory and practice. They effectively set the scene for Volume Two by showing how the management of risky assets and uncertain liabilities within an integrated, coherent framework remains the core problem for both financial institutions and other business enterprises as well. \*Each volume presents an accurate survey of a sub-field of finance \*Fills a substantial gap in this field \*Broad in scope
