The book explains the principles and practice of bookkeeping sequentially, including: ·The bank reconciliation ·Writing up the petty cash book ·Extracting a trial balance ·Accruals and prepayments ·Setting up a limited company ·Accounting for VAT Plus step-by-step guides to compiling a balance sheet, depreciation, accounting for bad and doubtful debts and much more. The 10th edition also includes significant enhancements to reflect the teachings of the principle bookkeeping institutes as they endeavour to raise the professional competence of their members. For example, accounting staff are increasingly being required to extend their record keeping into management accounts areas. The new edition includes chapters on stock control and budgetary control accounting. In addition, it will include more detailed guidance on the significance and importance of ratio analysis and statements of sources and application of funds, plus the latest available IAB and ICB exam papers.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

For Management Accounting modules on undergraduate and MBA courses. Understand management accounting principles and techniques, and develop skills to make informed business decisions Management Accounting for Decision Makers 10th Edition by Peter Atrill and Eddie McLaney teaches you how to make the best choices in business and management roles, and introduces you to essential management accounting concepts and methods with a focus on their significance to real-life decision making. It has never been more important for businesses to operate within a framework of strategic planning and decision making. This popular text makes management accounting relevant and practical through its use of real numerical accounting techniques, an increased number of exercises that encourage you to learn in an active way, and through a range of relevant, real-world examples, many of which are new to this edition. “ A plethora of relevant real-world examples, self-assessment activities and helpful visuals make this an engaging and practical read for students and educators alike! ” Dr Christos Begkos, Assistant Professor in Management Accounting, Alliance Manchester Business School. "This text provides a very clear, comprehensive and highly informative introduction to management accounting, and it has consistently proved to be very popular with both accounting & finance and business management students studying management accounting for the first time." Martyn Jones, Senior Lecturer in Accounting, University of Winchester Also available with MyLab Accounting MyLab™ is the teaching and learning platform that empowers you to reach every student.
