There's a common belief that cyberspace cannot be regulated-that it is, in its very essence, immune from the government's (or anyone else's) control.Code argues that this belief is wrong. It is not in the nature of cyberspace to be unregulable; cyberspace has no "nature." It only has code-the software and hardware that make cyberspace what it is. That code can create a place of freedom-as the original architecture of the Net did-or a place of exquisitely oppressive control.If we miss this point, then we will miss how cyberspace is changing. Under the influence of commerce, cyberspace is becoming a highly regulable space, where our behavior is much more tightly controlled than in real space.But that's not inevitable either. We can-we must-choose what kind of cyberspace we want and what freedoms we will guarantee. These choices are all about architecture: about what kind of code will govern cyberspace, and who will control it. In this realm, code is the most significant form of law, and it is up to lawyers, policymakers, and especially citizens to decide what values that code embodies.

""Tips for Teaching Pronunciation""shows English language teachers how to teach the North American sound system. This practical reference book provides practical tips, clear explanations, diagrams, and sample classroom activities. Each chapter covers one of the five main areas of pronunciation -- vowels, consonants, stress, rhythm, and intonation. The companion audio CD in the text provides listening material for select activities. Features: What the teacher should know sections set the scene with pedagogical research. Concrete tips provide practical classroom suggestions for teaching vowels, consonants, stress, rhythm, and intonation. Sections on Specific Features in each chapter cover common pronunciation problems that teachers find challenging. Sample activities for Specific Feature exemplify how to implement the tips. Practical suggestions show how to integrate pronunciation with other skill areas. Clear diagrams demonstrate how to articulate vowels and consonants. Extensive descriptions help teachers prepare for pronunciation problems common to specific languages groups. Photocopiable diagnostic test and handouts can be used in class with minimal preparation. Audio CD provides listening material for select activities. The Tips for Teaching series covers topics of practical classroom-centered interest for English language teachers. Written in clearly comprehensible terms, each book offers soundly conceived practical approaches to classroom instruction that are firmly grounded in current pedagogical research. The content of this book arises from the Equine Nutrition Conference - Practice (ENUCO) 2007. The purpose of the conference is to supply scientifically validated practical hints and state of the art knowledge on equine nutrition and training. The topics dealt with in this publication are: - News on equine nutrition, training and medicine (2005-06). - Noteworthy changes to the Horse Nutrition Requirements by the National Research Council of USA. - Relevance and standardization of the terms Glycaemic Index and Glycaemic Response. - The role of nutrition in colic. - The use of herbs in the management of hyperadrenocorticism and other hormonal diseases of horses. - Diagnosis and management of insulin resistance and equine metabolic syndrome (EMS) in horses. - Food-allergy in horses.

Focus on Pronunciation 2 gives intermediate students the tools, tips, and techniques to help them speak English clearly and accurately. The variety of activities and accessible style makes learning fun. A five-part structure allows focused practice in individual sound areas: Vowels; Consonants; Syllables and Stress in Words; Rhythms; and Intonation. Features Clear explanations and diagrams make the text easy to use. Engaging activities, including games and high-interest listening and speaking tasks, guide students from controlled practice to communicative interaction. Self-study material and audio CDs offer students a wealth of practice outside the classroom.

With a friendly writing style and abundant illustrations, Pronunciation Made Simple (formerly English Pronunciation for International Students) helps students understand and achieve the pronunciation patterns of native English speakers. Appropriate for both classroom use and self-study, this confidence-building text motivates students to practice their skills outside the classroom.

This book is about the Roman villa complex of Hoogeloon, a key site for the understanding of the impact of empire on a peripheral region in the Roman North. The volume is not a simple site report but the synthesis of an academic research programme. It offers an original, multi-dimensional perspective on the social dynamics that led to the development of a large villa in the relatively poor and peripheral hinterland of the Lower Rhine limes. A central role is attributed to agency and the interplay of military and urban networks and native social structures. At the same time the book offers a synthesis of one of the best investigated rural areas of the Roman empire. Themes discussed include town-country relations, monetization, the agrarian economy of the region, changing settlement systems, and the ethnic identity of the inhabitants. This collection of essays written by leading specialists in the field offers a fresh perspective on the integration of marginal areas in the Roman Empire and is essential reading for anyone interested in the comparative analysis of the Roman countryside.
