Why do we forget about people when we talk about innovation? Innovation has been a popular subject for the last years. Bruce Nussbaum, perhaps exaggerating, said "Innovation died in 2008, killed off by overuse, misuse, narrowness, incrementalism and failure to evolve. It was done by CEOs, consultants, marketeers, advertisers and business journalists who degraded and devalued the idea by conflating it with change, technology, design, globalization, trendiness, and anything new. It was done by an obsession with measurement, metrics and maths and a demand for predictability in an unpredictable world." If so, why another book on innovation? Because it is not one more book on the subject! It is a book that does not talk about innovation, but about people. Is there anything as important as people when innovating? This book describes how to create a true culture of innovation, a culture where innovation is not an objective, but a consequence.

Katharine Susannah Prichard was born in 1883 to Australian parents then living in Fiji, but she grew up in Tasmania, lived for a while in both Melbourne and London before finally settling in Western Australia. She was one of the co-founders of the Communist Party of Australia in 1921, and her status as a communist and a female writer led to her being frequently under surveillance and harassment by the Australian police and other government authorities. She wrote The Black Opal in 1921, and the novel focuses on the very close-knit opal-mining community living and working on Fallen Star Ridge, a fictitious location set in New South Wales, Australia. Life is hard for the miners as their fortunes rise and fall with the amounts and quality of black opal they can uncover. Black opal is a beautiful mineral with fiery gleams of color, much valued for jewelry. Finding productive seams of such opal is a matter of both hard work and good luck. The novel is a well-drawn study of the relationships of the people living on the Ridge, and the two main characters are portrayed with clarity: Michael Brady, an older man much respected by the other miners for this knowledge and ethical approach, and Sophie Rouminof, a beautiful teenage girl who is the darling of the camp but who abruptly runs away to America after being disappointed in love. Despite the difficulties the individual miners face, there is a community spirit and an agreement on basic values and principles of behavior at the Ridge. But this community of shared endeavor is eventually jeopardized by the influence of outsiders, in particular an American who wishes to buy up the individual mines, operate them under a company structure, and simply pay the miners a salary. This conflict between capitalism and honest manual labour becomes one of the most important themes of the work. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Collecting two of the original Japanese volumes into each value-priced Dark Horse edition, this volume has a disturbing cliffhanger ending that will have readers clamoring for more!

Globalization has become a widely used buzzword, yet popular discussions often miss its deeper realities. This book offers the first clear explanation of the impact of colonialist legacies in a globalized world in an era defined by the "War on Terror." Sankaran Krishna explores the history of the relationship between Western dominance and the forms of resistance that have emerged to challenge it. Moving beyond the simple formulation of "They hate us because we are rich, we are free, and they are crazy," he asks, "What have we done that might generate such animosity? What face has the United States presented to the developing world over time? Krishna argues that we live on an interrelated globe, that history matters a great deal in constructing contemporary realities, and that others create stories or narratives about the world based on their experiences just as we do based on ours. He contends that the interactions between the West and the non-West have not been politically innocent, economically egalitarian, or culturally benign in their consequences. Presenting a lucid exploration of the intertwined histories of both globalization and postcolonialism, this book uses compelling real-world examples to make sense of this crucial relationship.

Learn the fundamentals of anesthesiology in the context of real patients. 4 STAR DOODY’S REVIEW! "The book targets medical students, but even junior anesthesia trainees would find it very compelling...Although it has the appearance of a handbook, this book is an overview of clinical anesthesiology. It takes a simulation approach to drive home essential concepts of anesthesia management in different disease conditions. For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. Riding Man is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.
