Exploring the ambiguities of how we define the word 'culture' in our global society, this book identifies its imprint on architectural ideas. It examines the historical role of the cultural in architectural production and expression, looking at meaning and communication, tracing the formations of cultural identities. Chapters written by international academics in history, theory and philosophy of architecture,

examine how different modes of representation throughout history have drawn profound meanings from cultural practices and beliefs. These are as diverse as the designs they inspire and include religious, mythic, poetic, political, and philosophical references.

There is no place on earth that does not echo with the near or distant sounds of human activity. More than half of humanity lives in cities, meaning the daily soundtrack of our lives is filled with sound—whether it be sonorous, harmonious, melodic, syncopated, discordant, cacophonous, or even screeching. This new anthology aims to explore how humans are placed in certain affective attitudes and dispositions by the music, sounds, and noises that envelop

us. Sound and Affect maps a new territory for inquiry at the intersection of music, philosophy, affect theory, and sound studies. The essays in this volume consider objects and experiences marked by the correlation of sound and affect, in music and beyond: the voice, as it speaks, stutters, cries, or sings; music, whether vocal, instrumental, or machine-made; and our sonic environments, whether natural or artificial, and how they provoke responses in us. Far from being stable, correlations of sound and affect are influenced and even determined by factors as diverse as race, class, gender, and social and political experience. Examining these factors is key to the project, which gathers contributions from a cross-disciplinary roster of scholars, including both established and new voices. This agenda-setting collection

will prove indispensable to anyone interested in innovative approaches to the study of sound and its many intersections with affect and the emotions.

A. Kircher (1602?-1680) fut l'un des derniers polygraphes du monde occidental. Son autobiographie, publiée à Augsbourg en 1684, fait ici l'objet d'une approche philologique destinée à contextualiser son contenu. Divers décalages apparaissent en effet entre le texte de la Vita et les faits historiques reconstruits d'après les sources. Etude de ces remaniements et édition scientifique du texte.

comprehensive panorama of all fields of study investigating this surprising phenomenon.

In this fascinating book, the author traces the careers, ideas, discoveries, and inventions of two renowned scientists, Athanasius Kircher and Galileo Galilei, one a Jesuit, the other a sincere man of faith whose relations with the Jesuits deteriorated badly. The Author documents Kircher ' s often intuitive work in many areas, including translating the hieroglyphs, developing sundials, and inventing the magic lantern, and explains how Kircher was a forerunner of Darwin in suggesting that animal species evolve. Galileo ' s work on scales, telescopes, and sun spots is mapped and discussed, and care is taken to place his discoveries within

their cultural environment. While Galileo is without doubt the “ winner ” in the comparison with Kircher, the latter achieved extraordinary insights by unconventional means. For all Galileo ’ s fine work, the author believes that scientists do need to regain the power of dreaming, vindicating Kirchner ’ s view.

L ’ obiettivo di questo lavoro è duplice: da una parte viene indagato il rapporto tra Newton e l ’ alchimia, cercando di verificare quale rilevanza ebbe l ’ adesione all ’ Ars Transmutatoria nella vita e soprattutto nel pensiero del filosofo inglese. Poi, in maniera più specifica, si è cercato di indagare in dettaglio quale influenza possano avere avuto sul pensiero newtoniano gli scritti dell ’ alchimista pesarese

The terms Humanism and Renaissance are understood here in their larger meaning; they embrace all human activity - economics, law, science, technology, literature, philosophy, religion, art - in the course of the 15th and 16th centuries. The editors have, however, kept a certain suppleness with regard to the chronologic limits in order to take into account the asynchronous development of these cultural movements within the different countries. affrescò a Parma, all'interno del monastero benedettino femminile di San Paolo, una stanza dell'appartamento della badessa Giovanna da Piacenza. L'affresco si rivelò immediatamente di concezione innovativa, di tematica unitaria e di straordinaria felicità figurativa, grazie al mescolarsi di elementi naturalistici, mitologici e concettuali. La camera, destinata alla clausura e ignorata per oltre due secoli, fu riscoperta e valorizzata soltanto alla fine del Settecento. Con questo settimo quaderno della collana curata da Giuseppe Adani, la Fondazione "Il Correggio" porta nuovamente all'attenzione del pubblico la celebre camera, accogliendo l'innovativa interpretazione che ne dà Michele Frazzi. Oggetto dello studio è in particolare la cultura alchemica diffusa nel clima neoplatonico parmense del
