Chapter 10: Doors and glass Chapter 11: Trim and accessories Chapter 12: Welding

Auto Collision Repair and Refinishing details the latest collision repair and refinishing techniques, as well as more traditional repair procedures. It presents both the theoretical and practical aspects of collision repair and refinishing, preparing students for a fast-paced workplace that is becoming increasingly technical. Organized around the NATEF Collision Repair and Refinish Task List, this comprehensive textbook includes information on MIG welding, HVLP spray painting, paintless dent repair, low-VOC finishes, paint matching, structural frame repair, detailing, and flexible plastic component repair, and estimating. Detailed chapters on mechanical systems, such as brake systems, cooling systems, and restraint systems, allow students to recognize and repair common types of mechanical damage. An extensive estimating chapter provides unsurpassed instruction on this vital task, walking students through the steps required to estimate specific types of damage. Auto Collision Repair and Refinishing is an indispensable resource for students preparing for a career in collision repair and refinishing, as well as experienced technicians preparing for the ASE collision repair and refinish certification tests.

This highly engaging DVD training series features the most up-to-date content and latest technologies for all aspects of collision repair, including structural and non-structural repair as well as refinishing. Both the theoretical and practical aspects of auto body repair technology are detailed, preparing viewers for what it takes to be a successful auto body repair technician. Safe work techniques are stressed throughout and uphold the importance of following procedures as shown to ensure a secure repair environment.

Whether from hailstorms, parking lots, or plain bad judgment, everybody needs to know how to repair automotive bodywork at some point during their car-owning years. The Complete Guide to Auto Body Repair provides all the information you'll need to deal with any bumps, bangs, and bruises your car encounters. From tools to materials to techniques, this book takes the reader all the way through the process. Beginning with creating a strategy, then moving through disassembly, repair, reassembly, and preparing the surface for paint, author Dennis W. Parks shows how to repair damage from collisions, neglect, and rust.

This workbook combines review activities and practical applications that relate to the content of the textbook chapters from Auto Collision Repair and Refinishing. Questions designed to reinforce the textbook content help students review their understanding of the terms, concepts, theories, and procedures presented in each chapter. The Lab Workbook also contains a series of Job Sheets that provide hands-on practice of skills and procedures aligned to the ASE Education Foundation Tasks. The jobs engage students with the practical skills needed to succeed and are designed to be accomplished in one or two lab sessions. The Shop Manual Job Sheets are intended to be completed in a shop setting under the guidance of an instructor.

Vehicle maintenance.

Overview: This new book covers all the necessary tasks for gaining knowledge of collision repair and refinishing as outlined by NATEF. In-depth coverage includes structural and non-structural analysis and damage repair, welding, painting and refinishing, paint chemistry, sacrificial coatings for corrosion resistance, and more.
