Britain was rapidly emerging as the most powerful European nation, a position France long believed to be her own. Yet with France still commanding the largest continental army, Britain saw its best opportunities for expansion lay in the East. Yet, as Britains influence increased through its official trading arm, the East India Company, the ruler of Bengal, Nawab Siraj-ud-daulah, sought to drive the British out of the subcontinent and turned to France for help. The ensuing conflict saw intimate

campaigns fought by captains and occasionally colonels and by small companies rather than big battalions. They were campaigns fought by individuals rather than anonymous masses; some were heroes, some were cowards and most of them were rogues on the make. The story is not only about Robert Clive, a clerk from Shropshire who became to all intents and purposes an emperor, but also about Eyre Coote an Irishman who fought with everyone he met, about Alexander Grant a Jacobite who first escaped from Culloden and then, Flashman-like was literally the last man into the last boat to escape Calcutta and the

infamous Black Hole. The fighting culminated in Robert Clives astonishing victory at Plassey where just 3,000 British and sepoy troops defeated Siraj-ud-Daulahs Franco-Bengali army of 18,000 in the space of only forty minutes. The victory at Plassey in 1757 established Britain as the dominant force in India, the whole of which gradually come under British control and became the most prized possession in its empire. Few battles in history have ever had such profound consequences.

The Battle of Plassey, won by Robert Clive

for Britain, was decisive in establishing a firm base in Bengal and from that victory the British became an imperial power whose Indian Empire was to last for nearly 200 years.

Plentiful and apposite illustrations throughout this work lend humanity and colour to a study important not less in imperial than in purely military terms.

explores how empire in Asia shaped British country houses, their interiors and the lives of their residents. It includes chapters from researchers based in a wide range of settings such as archives and libraries, museums, heritage organisations, the community of family historians and universities. It moves beyond conventional academic narratives and makes an important contribution to ongoing debates around how empire impacted Britain. The volume focuses on the propertied families of the East India Company at the height of Company rule. From the Battle of Plassey in 1757 to the outbreak of the Indian Uprising

in 1857, objects, people and wealth flowed to Britain from Asia. As men in Company service increasingly shifted their activities from trade to military expansion and political administration, a new population of civil servants, army officers, surveyors and surgeons journeyed to India to make their fortunes. These Company men and their families acquired wealth, tastes and identities in India, which travelled home with them to Britain. Their stories, the biographies of their Indian possessions and the narratives of the stately homes in Britain that came to house them, frame our

for military leadership, he proceeded to consolidate the company's commercial and territorial position in South India before doing the same in the northeast in Bengal. In 1757 company troops under his command defeated the Nawab of Bengal at the Battle of Plassey. This victory set in motion the East India Company's ascendancy over much of India and eventual development into the world's largest transnational trading company at the time. This paved the way for the 1857 creation of the British Raj, which would last for another ninety years. Clive is a fascinating and important historical figure:

a lowly company employee who rose to great heights; an informally trained military commander who led company and local Indian troops to a series of stirring victories over local rivals who were supported by the French; a grasping politician who used his great wealth to secure a prominent social position; and, finally, a hounded society notable who, plagued by illness, allegedly took his own life. No one in the early days of the British ventures in India was as well known or as controversial as Clive. Today, when empire and globalism are witnessed and talked about with ease, Clive's position as
