At the sun-drenched dawn of human history, in the great plain between the two great rivers, are the cities of men. And each city is ruled by its god. But the god of the city of Gibil is lazy and has let the men of his city develop the habit of thinking for themselves. Now the men of Gibil have begun to devise arithmetic, and commerce, and are sending expeditions to trade with other lands. They're starting to think that perhaps men needn't always be subject to the whims of gods. This has the other god worried. And well they might be...because human cleverness, once awakened, isn't likely to be easily squelched.

This fundamental study provides the first comprehensive history in any language of the lands between the Red and Pearl Rivers in southern China and the people who resided there over a span of a thousand years. Bringing to life the mysterious early people known as Li and Lao who inhabited the area, Catherine Churchman explores their custom of casting large bronze kettledrums. As the symbols of political authority and legitimacy for the Li and Lao rulers, the abundance of drums found in the archaeological record is an indication not only of the great number of such rulers, but also of their great wealth and power, which increased significantly from the third century CE even as the Chinese Empires tightened their control over surrounding districts. Drawing on a combination of Classical Chinese sources and scholarship in archaeology, anthropology, and historical linguistics, the author explains the political and economic factors behind the rise to power and subsequent disappearance of the indigenous leadership and its drum culture. She fills significant gaps in our understanding of the early interactions between China and northern Southeast Asia, challenging many widely held assumptions about the history of Chinese settlement and ethnic relations in the region, including those concerning the relationship between the Chinese Empires and the lands that would form the heart of a future Vietnamese state. A crucial work for understanding historical developments in the highland regions south of the Yangtze valley, it examines the first steps in the Sinic penetration of this highland world, one that has continued to the present. Bringing unprecedented attention to the historical identity of a previously overlooked region and a people, this book creates a new category in East Asian history.

"Examines the impact of rivers on humans and, conversely, the impact of humans on rivers. The authors view this dynamic relationship through political, cultural, industrial, social, and ecological perspectives in national and transnational settings. This book analyzes the regional, national, and international politicization of rivers, the use and treatment of waterways in urban versus rural environments, and the increasing role of international commissions in ecological and commercial legislation for the protection of river resources"--From publisher description.

A retelling of Thomas Nuttall's near-death expedition up the Arkansas River in the early years of the nineteenth century

A survey of recent scholarship shows that historians who are skeptical about any "real" history of early Israel have disparaged the idea that Israel had an early presence in Transjordan. This skeptical stance, however, is by no means shared by everyone. Cross, for instance, asserted that the tribe of Reuben was a catalyst for Yahwism in the period preceding the rise of kings in Israel and Transjordan (in the 10th/9th centuries B.C.). Weaving together biblical, extrabiblical, and archaeological data available to him at the time (1988), Cross demonstrated the reality of an early Israelite presence in Transjordan. Ongoing excavations at Tall al-Umayri, the type-site for the Late Bronze/Iron I transition in the region bounded by the Wadi Zarqa in the north and the Wadi Mujib in the south, and at Tall Madaba, which had an early Iron I settlement, now confirm a tribal presence in these Transjordanian areas during the early Iron I. By bringing together applicable anthropological research and relevant biblical, extrabiblical, and archaeological data, Petter outlines a context-driven interpretive framework within which to plot tribal ethnic expressions in the past. From the perspective of the *longue dur e*, we can see that frontier regions tend to exhibit episodic changes of hand: competing sides claimed legitimate ownership, sometimes by way of making the gods owners of the land.

The decades between 1880 and the 1920s were glorious ones for Manhattan. This sliver of land located between the rivers was evolving from a bustling seaport into a world financial center. Manhattan rapidly became America's preeminent East Coast steamship port. Steamers were becoming a frequent and luxurious mode of transportation. They arrived in Manhattan carrying passengers from all walks of life--the very rich and the very poor. Wealthy travelers made their voyages on the palatial reaches of the upper decks and were the catalyst that spawned the gilded era of Manhattan's hotels. Working-class passengers, on the other hand, traveled deep below decks. From the damp, dark reaches of the steamers poured a flood of immigrant labor and talent that enriched the area's industries. In the 1880s, no building stood as tall as the spire of architect Richard Upjohn's Trinity Church. Along the city streetscape, trolleys were pulled by horses, and steam-powered, elevated trains sliced north from the battery to upper Manhattan. The 1890s began the defining decades of the skyscraper. The technology originated in Chicago but soared to new heights in Manhattan. By the turn of the century, there were more skyscrapers on the island than anywhere else in the world.

John Hann focuses in this study on the Apalachee Indians and their interactions with the Spanish during the historic period. Following a description of the prehistoric Apalachee, Hann delves into the encounters between the Apalachee and the first European intruders. He synthesizes historical and archaeological information on the establishment and growth of the western Florida missions, including pertinent data from the prominent and pivotal state of San Luis de Talimali. A sympathetic view of the culture and customs of the historic Apalachee and a translation of Father Paiva's impassioned ball game manuscript are followed by sections on Apalachee political structure, language, demographic trends, and mission economy. Hann concludes with data on the demoralization of the Apalachee and its effects on the missions and, ultimately, on the exile and extinction of the Apalachee people.

How an Hispano community maintained its identity over four centuries Located in Albuquerque's south valley, Atrisco is a vibrant community that predates the city, harking back to a land grant awarded in 1692. Joseph P. S nchez explores the evolution of this parcel over the four centuries since the first Spanish settlers arrived. He tracks its transformation from an individual to a community grant, peeling away the layers of historical events that have made Atrisco the last piece of undeveloped real estate in a growing metropolitan area. S nchez examines the creation of Atrisco as a frontier community during the Spanish and Mexican periods and shows how it maintained its identity and land ownership into the American era. He describes the historical processes of colonization, land tenures and transfers, and social and economic activity. He also assesses the transfer of the land grant to a private corporation and its subsequent fate, and considers Atrisco's role in the future of Albuquerque. Today more than 30,000 New Mexicans are descended from the early settlers of Atrisco; and because few places in the United States have retained their Spanish and Mexican influences as have the New Mexican land grants, the history of Atrisco offers a unique perspective. S nchez's study preserves Atrisco's origins as part of that area's Hispano heritage, depicting people who learned to defend their culture against outside challenges and embedding local history in a larger regional saga.
