Andrew W. Saul is the star of the new feature-length documentary film, THAT VITAMIN MOVIE. Off screen, he is Editor-in-Chief of the Orthomolecular Medicine News Service and is on the editorial board of the Journal of Orthomolecular Medicine. He has published some 200 peer-reviewed articles, and has written or coauthored twelve books.

A new, evolutionary explanation of markets and investor behavior Half of all Americans have money in the stock market, yet economists can't agree on whether investors and markets are rational and efficient, as modern financial theory assumes, or irrational and inefficient, as behavioral economists believe. The debate is one of the biggest in economics, and the value or futility of investment management and financial regulation hangs on the answer. In this groundbreaking book, Andrew Lo transforms the debate with a powerful new framework in which rationality and irrationality coexist—the Adaptive Markets Hypothesis. Drawing on psychology, evolutionary biology, neuroscience, artificial intelligence, and other fields, Adaptive Markets shows that the theory of market efficiency is incomplete. When markets are unstable, investors react instinctively, creating inefficiencies for others to exploit. Lo's new paradigm explains how financial evolution shapes behavior and markets at the speed of thought—a fact revealed by swings between stability and crisis, profit and loss, and innovation and regulation. An ambitious new answer to fundamental questions about economics and investing, Adaptive Markets is essential reading for anyone who wants to understand how markets really work.

This work, covering the years 1811-1815, makes the contents of some of the tens of thousands of sales catalogues published during the 19th century accessible to scholars. Each volume is organized in four main sections: a chronological index of sales; an alphabetical index of paintings by artists; an alphabetical index of owners; and an alphabetical index of previous owners. Information provided includes sales dates and lot numbers, prices and names of buyers and sellers, and locations of auctions.

This book is a slightly revised version of my doctoral dissertation which has been accepted by the Department of Economics and Business Administration of the Justus-Liebig-Universitat Giessen in July 2002. I am indebted to my advisor Prof. Dr. Volbert Alexander for encouraging and supporting my research. I am also grateful to the second member of the doctoral committee, Prof. Dr. Horst Rinne. Special thanks go to Dr. Ralf Ahrens for providing part of the data and to my colleague Carsten Lang, who spent much time reading the complete first draft.
