Kafka on the Shore displays one of the world’s great storytellers at the peak of his powers. Here we meet a teenage boy, Kafka Tamura, who is on the run, and Nakata, an aging simpleton who is drawn to Kafka for reasons that he cannot fathom. As their paths converge, acclaimed author Haruki Murakami enfolds readers in a world where cats talk, fish fall from the sky, and spirits slip out of their bodies to make love or commit murder, in what is a truly remarkable journey.

Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Katherine Shaw—Kate—is happy with her life. She has supportive friends, a glamorous magazine career, and a love of all things Jane Austen. But when she loses her job, her beloved grandmother falls ill and a financial disaster forces a sale on the family home, Kate finds herself facing a crisis that would test even the most stalwart of Austen heroines. Friends rally round, connecting her to freelance gigs, and presenting her with a birthday gift— title to land in Scotland—that's about to come in very handy. Turns out that Kate's first freelance assignment is to test an Austen-inspired theory: in the toughest economic times is a wealthy man the only must-have accessory? What begins as an article turns into an opportunity as Kate—now Lady Kate—jet-sets to Palm Beach, St Moritz and London where, in keeping company with the elite, she meets prospects who make Mr. Darcy look like an amateur. But will rubbing shoulders with men of good fortune ever actually lead her to love? And will Kate be able to choose between Mr. Rich and Mr. Right?
