~~Ari Meisel and Nick Sonnenberg recently launched a profitable Virtual Assistant (VA) business in just one day - challenging the startup mentality that every new venture requires months of planning and a large investment of capital. Their VA business was born from scribbled notes on a cocktail napkin during dinner and was an up-and-running less than 24 hours later. By following their 3 step process: Optimize, Automate, Outsource, they leveraged free, readily available digital tools and apps with no outlay of cash whatsoever. Meisel and Sonnenberg reveal tactics for building a scalable business in today's world. This fascinating and informative book chronicles their first year in business together. An essential read for any entrepreneur. It follows their journey from idea to execution, detailing a bold new approach to 21st century business based on a fearless ingenuity and a willingness to rewrite the rules.~~

~~How the world's leading innovators push their ideas to fruition again and again Edison famously said that genius is 1 percent inspiration, 99 percent perspiration. Ideas for new businesses, solutions to the world's problems, and artistic breakthroughs are common, but great execution is rare. According to Scott Branson, the capacity to make ideas happen can be developed by anyone willing to develop their organizational habits and leadership capability. That's why he founded Behance, a company that helps creative people and teams across industries develop these skills. Branson has spent six years studying the habits of creative people and teams that are especially productive—the ones who make their ideas happen time and time again. After interviewing hundreds of successful creatives, he has compiled their most powerful—and often counterintuitive—practices, such as: • Generate ideas in moderation and kill ideas liberally • Prioritize through nagging • Encourage fighting within your team While many of us obsess about discovering great new ideas, Branson shows why it's better to develop the capacity to make ideas happen—a capacity that endures over time.~~

~~Taking an idea and turning it into a business can be a very rewarding experience. The challenging part is understanding the idea you have and realizing the various components that it takes to form and operate a successful business. This book explores a variety of essential habits and tasks that entrepreneurs need to preform and establish a successful business. It starts by taking an internal look at oneself to see if starting a business fits the lifestyle and personality of the individual. After personal traits and habits that are needed to be adopted are identified, the book transitions into laying the framework to start the business. Some of the areas this book will explore include analyzing the idea and formulating the plan. Many businesses realize too late the group thought to be the target customer group is not the right target group for the product. In addition to determining who is going to buy the product, one also must also complete research to determine the target customer base. From there, the book will go into detail regarding how to formulate a marketing plan and a business plan. This book also covers the basics of fiscal forecasting entrepreneurs will need to know in order to establish a solid plan and know what capital it will take to be successful. If you want to know what it takes, how to take an idea, form a plan, develop a strategy and execute your new business then you must read this book.~~

~~Even world-class companies, with powerful and proven business models, eventually discover limits to growth. That's what makes emerging high-growth industries so attractive. Although they lack a proven formula for making a profit, these industries represent huge opportunities for the companies that are fast enough and smart enough. But constructing tomorrow's businesses while simultaneously sustaining excellence in today's, demands a delicate balance. It is a quest fraught with contradiction and paradox. Until now, there has been little practical guidance. Based on an in-depth, multiyear research study of innovative initiatives at ten large corporations, Vijay Govindarajan and Chris Trimble identify three central challenges: forgetting yesterday's successful processes and practices; borrowing selected resources from the core business; and learning how the new business can succeed. The authors make recommendations regarding staffing, leadership roles, reporting relationships, process design, planning, performance assessment, incentives, cultural norms, and much more. Breakthrough growth opportunities can make or break companies and careers. Ten Rules for Strategic Innovators is every leader's guide to execution in unexplored territory.~~

~~#1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you ’ re running an entire company or in your first management job. “ A must-read for anyone who cares about business. ” —The New York Times When Execution was first published, it changed the way we did our jobs by focusing on the critical importance of “ the discipline of execution ” : the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a “ vision ” and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.~~

~~BUSINESS STRATEGY. "The 4 Disciplines of Execution "offers the what but also how effective execution is achieved. They share numerous examples of companies that have done just that, not once, but over and over again. This is a book that every leader should read! (Clayton Christensen, Professor, Harvard Business School, and author of "The Innovator s Dilemma). " Do you remember the last major initiative you watched die in your organization? Did it go down with a loud crash? Or was it slowly and quietly suffocated by other competing priorities? By the time it finally disappeared, it s likely no one even noticed. What happened? The whirlwind of urgent activity required to keep things running day-to-day devoured all the time and energy you needed to invest in executing your strategy for tomorrow. "The 4 Disciplines of Execution" can change all that forever.~~
