The first major biography of the founder of modern Iraq, a charismatic champion of Arab independence and unity

The first king of Iraq, Faisal I, was installed by the British in 1921 - he was pro-British, and was thus deemed 'suitable' to lead an independent Iraq. But his successors - his son Ghazi and Faisal II - both met their demise in suspicious and bloody manners. This book is a unique and timely account of Iraqi history.

This is a major re-evaluation of the life and legacy of Gertrude Lowthian Bell (1868-1926), the renowned scholar, explorer, writer, archaeologist, and British civil servant. The book examines Gertrude Bell's role in shaping British policy in the Middle East in the first part of the 20th century, her views of the cultures and peoples of the region, and her unusual position as a woman occupying a senior position in the British imperial administration. It focuses particularly on her involvement in Iraq and the part she played in the establishment of the Iraqi monarchy and the Iraqi state. In addition, the book examines her interests in Iraq's ancient past. She was instrumental in drawing up Iraq's first Antiquities Law in 1922 and in the foundation of the Iraq Museum in 1923. Gertrude Bell refused to be constrained by the expectations of the day, and was able to succeed in a man's world of high politics and diplomacy. She remains a controversial figure, however, especially in the context of the founding of the modern state of Iraq. Does she represent a more innocent age when the country was born out of the remnants of the Ottoman Empire, or does she personify the attitudes and decisions that have created today's divided

Middle East? The volume's authors bring new insights to these questions.

On March 15, 2006, members from both parties in Congress supported the creation of the bipartisan Iraq Study Group to review the situation on the ground and propose strategies for the way forward. For more than eight months, the Study Group met with military officers, regional experts, academics, journalists, and high-level government officials from America and abroad. Participants included George W. Bush and members of his cabinet; Bill Clinton; Jalal Talabani; Nouri Kamal al-Maliki; Generals John Abizaid, George Casey, and Anthony Zinni; Colin Powell; Thomas Friedman; George Packer; and many others. This official edition contains the Group ' s findings and proposals for improving security, strengthening the new government, rebuilding the economy and infrastructure, and maintaining stability in the region. It is a highly anticipated and essential step forward for Iraq, America, and the world.
