These routes showcase the best mountain walking to be found on both the French and the Italian sides of the Mont Blanc massif. The 50 contrasting day walks (3-20km) range from high-level walks to easy summits, mountain huts, viewpoints and mountain lakes, as well as less strenuous valley walks. Also included are four multi-day treks: Vallorcine to Plaine Joux, Vallorcine to Servoz, the Tour of the Aiguilles Rouges and a circuit of the Italian Val Ferret. Walks are organised according to the nearest town base: St Gervais les Bains and Les Contamines, Servoz and Plateau D'Assy, Les Houches, Chamonix, Argentiere, Vallorcine and Courmayeur. Walks are Graded 1 to 3: grade 1 walks are manageable by any reasonably fit person on good, usually waymarked paths, while grade 3 routes are long, tough routes, often without waymarking, making navigation difficult:

The evidence for the Little Ice Age, the most important fluctuation in global climate in historical times, is most dramatically represented by the advance of mountain glaciers in the sixteenth and seventeenth centuries and their retreat since about 1850. The effects on the

landscape and the daily life of people have been particularly apparent in Norway and the Alps. This major book places an extensive body of material relating to Europe, in the form of documentary evidence of the history of the glaciers, their portrayal in paintings and maps, and measurements made by scientists and others, within a global perspective. It shows that the glacial history of mountain regions all over the world displays a similar pattern of climatic events. Furthermore, fluctuations on a comparable scale have occurred at intervals of a millennium or two throughout the last ten thousand years since the ice caps of North America and northwest Europe melted away. This is the first scholarly work devoted to the Little Ice Age, by an author whose research experience of the subject has been extensive. This book includes large numbers of maps, diagrams and

photographs, many not published elsewhere, and very full bibliographies. It is a definitive work on the subject, and an excellent focus for the work of economic and social historians as well as glaciologists, climatologists, geographers, and specialists in mountain environment.
