Multicultural education is a construct that has been very useful for many years in harboring sensitivities teachers need in addressing diverse students. Now the discipline needs refreshing. In the global society, the idea of multicultural education, a decidedly Western formation, needs to expand its conceptual boundaries. Salient issues in multicultural education such as individual identities, social justice, and equity are bedrock concerns of multicultural educators. These concepts are considered necessary but not sufficient in shaping an evolving model of multicultural education. The complexity of humans and modern and emerging societies requires a broadened scope of the understanding of contemporary multicultural theory and practice. *Evolving Multicultural Education for Global Classrooms* addresses multicultural education from a comprehensive viewpoint that acknowledges the historical benefit of multicultural education and recognizes a need to inform the discipline with a broader viewpoint. As most knowledge on multicultural education comes from a Western perspective and the scholarship on the topic is weakening, the chapters in this book

In his new book, Michael Vavrus helps readers better understand why issues of diversity and difference are so highly contested in the United States and across the globe. Vavrus incorporates specific education examples throughout the text to examine six contested areas: race and ethnicity; socioeconomic class and culture; multicultural and ethnic studies; language; religion; and sexuality and gender. In each of these areas, the author explores how contrasting worldviews found in social conservatism, liberal multiculturalism, and critical multiculturalism influence our understandings about difference and diversity and the education policies we develop as a result. *Diversity and Education* is designed to help educators move beyond the “how can they believe that?” knee-jerk reaction toward a more informed, strategic understanding of belief systems and political affiliations. **Book Features:** Brings a contemporary, 21st – century perspective to differing political orientations toward diversity and education. Examines outcomes of diversity debates on children of color, the poor, immigrants, women, and sexual and religious minorities. Uses critical pedagogy with a historical and political economy lens to explain current diversity issues in education. Critiques the diversity stance of new national teacher education standards from the Council for Accreditation of Educator Preparation. “*Diversity and Education* can not only help us have conversations about racism, institutionalized oppression, and cultural fear, it can also offer an intervention that can move readers towards a deeper critical consciousness about diversity and multicultural education in their own lives.” —From the Foreword by Wayne Au, associate professor at the University of Washington, Bothell, and an editor for *Rethinking Schools* “Few education scholars have offered as potent and cogent a political and economic

Vavrus clearly believes in the power of teachers who are well-educated critical thinkers. In this lucid and compelling text, he skillfully applies a highly useful framework to unpack historical and contemporary debates about core concepts underlying multiple struggles for education and rights. ” —Christine Sleeter, professor emerita, California State University, Monterey Bay
