The Japanese motor industry worldwide.

Exploring the concept of win-win agreements, this book analyses how they pose an important challenge for entrepreneurs, managers and advisors involved in complex negotiations among firms. Providing an overview and discussion of existing literature, the author further develops a theoretical framework for analysing corporate negotiations, and illustrates how this can be implemented in real-life situations. This book presents an empirical case study from the automotive industry and analyses the negotiation between Fiat Chrysler in 2009, offering practical strategies for those involved in corporate negotiations. Presenting how win-win agreements can improve competitive advantage, this book will be an invaluable read for practitioners and scholars alike.

This full-color, oversized hardcover art book delves deep into the lore of the tremendously popular competitive first-person shooter Apex Legends. Explore the world of the hit game through the eyes of the lovable robot, Pathfinder, as he chronicles his journey throughout the various environs of the Outlands to interview his fellow Legends--all in the hope of finally locating his mysterious creator. The rich history of Apex Legends is explained by the characters that helped to shape it, as are their unique bonds of competition and camaraderie. This volume chronicles the world of Respawn Entertainment's stunning free-to-play game that has captivated the online gaming scene, attracting over seventy million players and counting. Don't miss your opportunity to own a piece of Apex Legends history!

Hybrid drives and the operation of hybrid vehicles are characteristic of contemporary automotive technology. Together with the electronic driver assistant systems, hybrid technology is of the greatest importance and both cannot be ignored by today's car drivers. This technical reference book provides the reader with a firsthand comprehensive description of significant components of automotive technology. All texts are complemented by numerous detailed illustrations.

With the increasing popularity of GM's LS-series engine family, many enthusiasts are ready to rebuild. The first of its kind, How to Rebuild GM LS-Series Engines, tells you exactly how to do that. The book explains variations between the various LS-series engines and elaborates up on the features that make this engine family such an excellent design. As with all Workbench titles, this book details and highlights special components, tools, chemicals, and other accessories needed to get the job done right, the first time. Appendicies are packed full of valuable reference information, and the book includes a Work-Along Sheet to help you record vital statistics and measurements along the way.

Caravan & Motorhome Electrics is the totally rewritten successor of the original globally selling Motorhome Electrics. The book's content now also covers every aspect of designing, installing and fault finding of the electrics in fifth wheel and conventional caravans and camper trailers. The book explains how things work, and what they do (not what vendors claim they do). It shows how to dramatically improve charging performance, successfully install solar, and reduce energy draw of electric (especially) three-way fridges. Essentially it provides solutions proven to work, not suggestions that may work. The author shows how the ongoing move fully voltage controlled alternators necessitates dc-dc alternator charging. And that, post 2016, regulations are likely to limit or even preclude alternator charging with new vehicles. It covers the solutions in depth: i.e. solar, plus fuel cell's 24/7 power generation (light and compact yet silent and non-polluting (and now existing in LPG form), needing only a small battery for peak loads. As with all Collyn's books, the content is thoroughly researched, technically accurate, yet in plain English, plus explanatory illustrations, many of the author's own vehicles. The author's background includes automobile research, electronics and large scale magazine publishing (including founding the world's largest electronics magazine). He was technical editor of Australia's The Bulletin magazine in the 1980s - and has supplied Tech Notes to The Wanderer for a now 14 years.
