North Korea Confidential

All in all, North Korea Confidential provides a useful counterbalance to the one-dimensional pictures we tend to hear from most defectors and occasional dissidents and from the news and analysis that looks at the country from the top down rather than the bottom up. Daniel Tudor and James Pearson are both British journalists.

In North Korea Confidential, Tudor and Pearson challenge these assumptions by detailing the very capitalist lives of North Koreans today. The main premise of this book is that Tudor and Pearson seek to argue that not only has North Ko North Korea is most often presented as a barren wasteland, devoid not only of food and human rights, but also of any real culture or free thought.

North Korea Confidential: Private Markets, Fashion Trends, Prison Camps, Dissenters, and Defectors. As its title suggests, North Korea Confidential is written by two highly knowledgeable British journalists whose main aim is to counter the usual view that all North Koreans are either "brainwashed worshipers" of North Korea's founding father, Kim Il-sung, or "helpless victims" of his grandson, Kim Jong-un, the third leader of this unusual semi-Marxist dy nasty.

Named one of the best books of 2015 by The Economist Private Markets, Fashion Trends, Prison Camps, Dissenters and Defectors. North Korea is one of the most troubled societies on earth. The country's 24 million people live under a violent dictatorship led by a single family, which relentlessly pursues the development of nuclear arms, which periodically incites risky military clashes with the larger, richer, liberal South, and which forces each and every person to play a role in the "theater state" even as it pays little more than lip service to the wellbeing of the overwhelming majority. With this deeply anachronistic system eventually failed in the 1990s, it triggered a famine that decimated the countryside and obliterated the lives of many hundreds of thousands of people. However, it also changed life forever for those who survived. A lawless form of marketization came to replace the iron rice bowl of work in state companies, and the Orwellian mind control of the Korean Workers' Party was replaced for many by dreams of trade and profit. A new North Korea Society was born from the horrors of the era—one that is more susceptible to outside information than ever before with the advent of k-pop and video-carrying USB sticks. This is

the North Korean society that is described in this book. In seven fascinating chapters, the authors explore what life is actually like in modern North Korea today for the ordinary "man and woman on the street." They interview experts and tap a broad variety of sources to bring a startling new insider's view of North Korean society—from members of Pyongyang's ruling families to defectors from different periods and regions, to diplomats and NGOs with years of experience in the country, to cross-border traders from neighboring China, and textual accounts appearing in English, Korean and Chinese sources. The resulting stories reveal the horror as well as the innovation and humor which abound in this fascinating country.

What is life in North Korea really like? This fascinating book by celebrated journalists Daniel Tudor and James Pearson explores that very question. The authors interview experts and tap a broad variety of sources to provide a startling insider's view of the secretive North Korean society, including: Members of Pyongyang's ruling families Defectors from different periods and regions Foreign diplomats and NGOs with years of experience in the country Cross-border traders from neighboring China Textual accounts appearing in English, Korean and Chinese sources This book reveals that ordinary North Koreans, poor and rich alike, enjoy listening to K-pop music and are addicted to South Korean TV dramas—in direct contravention of government dictates. Pirated foreign movies and shows—American, South Korean and Chinese—are often smuggled into the country and sold. Such snippets of information help the reader understand that North Korea is undergoing dynamic changes, affecting the 24 million people who call it home. This new edition is updated with an afterword by the authors that touches on Kim Jong-un's recent meetings with Donald Trump and Moon Jae-in. While the new foreword by Andray Abrahamian—a member of the U.S. National Committee on North Korea—offers a detailed analysis of North Korea's political discourse, changes in economic policy, and the rise and fall of optimism within the country since 2018.

"In his new book, *Ask a North Korean*, Daniel Tudor—a former Economist journalist and current Korean beer entrepreneur—wants people to understand the true lives of everyday North Koreans. Using translated essays written by defectors, the book covers topics from politics to pornography." —The Boston Globe *Understanding North Korea Through the Eyes of Defectors*. The weekly column *Ask A North Korean*, published by NK News, invites readers from around the world to pose questions to North Korean defectors. Adapted from the long-running column, these fascinating interviews provide authentic firsthand testimonies about life in North Korea and what is really happening inside the "Hermit Kingdom." North Korean contributors to this book include: "Seong" who went to South Korea after dropping out during his final year of university. He is now training to be an elementary school teacher. "Kang" who left North Korea in 2005. He now lives in London, England. "Cheol" who was from South Hamgyeong in North Korea and is now a second-year university student in Seoul. "Park" worked and studied in Pyongyang before defecting to the U.S. in 2011. He is now studying at a U.S. college. *Ask A North Korean* sheds critical light on all aspects of North Korean politics and society and shows that, even in the world's most authoritarian regime, life goes on in ways that are very different from what outsiders may think.

The first photographic exploration of North Korea, from a Westerner who lived in Pyongyang and explored the country beyond for nearly two years. What happens when you travel to a place where even basic truths are ambiguous? Where sometimes you can't trust your own eyes or feelings? Where the divide between real and imagined is never clear? For two years, Lindsey Miller lived in North Korea, long regarded as one of the most closed societies on earth. As one of Pyongyang's small community of resident foreigners, Lindsey was granted remarkable freedoms to experience the country without government minders. She had a front row seat as North Korea shot into the headlines during an unprecedented period of military tension with the US and the subsequent historic Singapore Summit. However, it was the connection with individuals and their families, and the day-to-day reality of control and repression, that delivered the real revelations of North Korean life, and which left Lindsey utterly changed from the woman who had nervously disembarked from her plane onto an empty runway just two years before. This is her extraordinary photographic account, a testament to the hidden humanity of North Korea. 'There was much of the North Koreans and their way of life that I liked and admired, and Lindsey Miller's book brought back those positive feelings. And if we don't acknowledge those we will never begin to understand the country.' Michael Palin Please note this is a fixed-format ebook with colour images and may not be well-suited for older e-readers.

A unique and timely account of life in North Korea. North Korea is like no other tyranny on earth. It is Orwell's 1984 made reality. The regime controls the flow of information to its citizens, pouring relentless propaganda through omnipresent loud speakers. Free speech is an illusion: one word out of line and the gulag awaits. State spies are everywhere, ready to punish disloyalty and the slightest sign of discontent. You must bow to Kim Il Sung, the Eternal Leader and to his son, Generalissimo Kim Jong Il. Worship the dead and then hail the living, the Supreme Leader Kim Jong Un. North Koreans are told their home is the greatest nation on earth. Big Brother is always watching. Posing as a university professor, award-winning BBC journalist John Sweeney travelled undercover to gain unprecedented access to the world's most secret state. Drawing on his own experiences and his extensive interviews with defectors and other key witnesses, *North Korea Undercover* pulls back the curtain, providing a rare insight into life there today, examining the country's troubled history and addressing important questions about its uncertain future. Sweeney's highly engaging, authoritative account illuminates the dark side of the Hermit Kingdom and challenges the West's perception of this paranoid nationalist state.

After providing an accessible history of the nation, the author turns his focus to what North Korea is, what its leadership thinks and how its people cope with living in such an oppressive and poor place, arguing that North Korea is not irrational, but rather a nation that has survived

against all odds.

“A crisp, dramatic examination of how technology and human ingenuity are undermining North Korea’s secretive dictatorship.” Kirkus Reviews One of the least understood countries in the world, North Korea has long been known for its repressive regime. Yet it is far from being an impenetrable black box. Media flows covertly into the country, and fault lines are appearing in the government’s sealed informational borders. Drawing on deeply personal interviews with North Korean defectors from all walks of life, ranging from propaganda artists to diplomats, Jieun Baek tells the story of North Korea’s information underground—the network of citizens who take extraordinary risks by circulating illicit content such as foreign films, television shows, soap operas, books, and encyclopedias. By fostering an awareness of life outside North Korea and enhancing cultural knowledge, the materials these citizens disseminate are affecting the social and political consciousness of a people, as well as their everyday lives. “A fine primer on the country, based on extensive interviews with defectors.” Times Literary Supplement “A fascinating book.” The New York Times “[A] timely and cogent book.” Los Angeles Review of Books “A fascinating and intelligent overview of the ways that information is liberating North Koreans’ minds.” Robert S. Boynton, author of The Invitation-Only Zone: The True Story of North Korea’s Abduction Project “A fascinating, important, and vivid account of how unofficial information is increasingly seeping into the North and chipping away at the regime’s myths—and hence its control of North Korean society.” Sue Mi Terry, former CIA analyst and senior research scholar at the Weatherhead East Asia Institute, Columbia University

Business in North Korea: a paradoxical and fascinating situation is interpreted by a true insider. In 2002, the Swiss power company ABB appointed Felix Abt its country director for North Korea. The Swiss Entrepreneur lived and worked in North Korea for seven years, one of the few foreign businessmen there. After the experience, Abt felt compelled to write A Capitalist in North Korea to describe the multifaceted society he encountered. North Korea, at the time, was heavily sanctioned by the UN which made it extremely difficult to do business. Yet he discovered that it was a place where plastic surgery and South Korean TV dramas were wildly popular and where he rarely needed to walk more than a block to grab a quick hamburger. He was closely monitored and once faced accusations of spying, yet he learned that young North Koreans are hopeful—signing up for business courses in anticipation of a brighter, more open, future. In A Capitalist in North Korea, Abt shares these and many other unusual facts and insights about one of the world’s most secretive nations.

Understanding North Korea through its propaganda What do the North Koreans really believe? How do they see themselves and the world around them? Here B.R. Myers, a North Korea analyst and a contributing editor of The Atlantic, presents the first full-length study of the North Korean worldview. Drawing on extensive research into the regime’s domestic propaganda, including films, romance novels and other artifacts of the personality cult, Myers analyzes each of the country’s official myths in turn—from the notion of Koreans’ unique moral purity, to the myth of an America quaking in terror of “the Iron General.” In a concise but groundbreaking historical section, Myers also traces the origins of this official culture back to the Japanese fascist thought in which North Korea’s first ideologues were schooled. What emerges is a regime completely unlike the West’s perception of it. This is neither a bastion of Stalinism nor a Confucian patriarchy, but a paranoid nationalist, “military-first” state on the far right of the ideological spectrum. Since popular support for the North Korean regime now derives almost exclusively from pride in North Korean military might, Pyongyang can neither be cajoled nor bullied into giving up its nuclear program. The implications for US foreign policy—which has hitherto treated North Korea as the last outpost of the Cold War—are as obvious as they are troubling. With North Korea now calling for a “blood reckoning” with the “Yankee jackals,” Myers’s unprecedented analysis could not be more timely.
