Billing and Coding Guidelines for Radiation Oncology (Part 1)

HCC coding is used to determine a risk-adjustment factor (RAF), a statistical tool that predicts the patient's cost of care based on the provider-reported International Classification of Diseases, Tenth Revision (ICD-10) and HCC diagnosis codes. Certain ICD-10 codes qualify as an HCC, but not all ICD-10 codes are HCC conditions.

key includes dissection of note for further clarification of proper coding.

Find all the coding details you need in a single convenient resource—on a single convenient page! There aren't enough hours in the day to sort through page after page in search of the information you need to code a procedure. Put an end to the chase and command your workflow with the cleverly designed Coders' Specialty Guide 2021: Urology/Nephrology. ONE CODE, ONE PAGE—that's AAPC's easy-access layout that puts you in the driver's seat. You get everything you need to file the

right code by referencing a single page. Coding was never faster—or more accurate—than with at-a-glance access to ICD-10 CrossRefs, CCI edits, RVUs, lay terms, procedure illustrations, and coding and billing tips. Take a giant leap forward with these essential features: 2021 new and revised CPT® codes for urology and nephrology with official descriptors for Categories I-III Lay term description for each procedure Descriptive illustrations to help you select codes accurately Fail-safe coding and billing advice for specific codes CPT® and HCPCS modifier crosswalk for procedures Medicare physician fee schedule (physicians and hospitals) with RVUs Coding indicators (pre-,

post-, intra-operative, global periods, and diagnostic tests) CCI edits Appendix with medical terms HCPCS codes, lay explanations, and tips to safeguard reimbursement for supplies/equipment/drugs ICD-10-CM-to-CPT® crosswalks to effectively code procedures Comprehensive code index with page numbers for quicker code look-up Color-coded tabs to help you navigate easily Command your workflow with mastery and bring in the revenue you deserve with the Coders' Specialty Guide 2021: Urology/Nephrology. *CPT® is a registered trademark of the American Medical Association

This edition of ICD-O, the standard tool for coding

diagnoses of neoplasms in tumour and cancer registrars and in pathology laboratories, has been developed by a working party convened by the International Agency for Research on Cancer / WHO. ICD-O is a dual classification with coding systems for both topography and morphology. The book has five main sections. The first provides general instructions for using the coding systems and gives rules for their implementation in tumour registries and pathology laboratories. Section two includes the numerical list of topography codes, which remain unchanged from the previous edition. The numerical list of morphology codes is presented in the next section, which introduces several

new terms and includes considerable revisions of the non-Hodgkin lymphoma and leukaemia sections, based on the WHO Classification of Hematopoietic and Lympoid Diseases. The five-digit morphology codes allow identification of a tumour or cell type by histology, behaviour, and grade. Revisions in the morphology section were made in consultation with a large number of experts and were finalised after field-testing in cancer registries around the world. The alphabetical index gives codes for both topography and morphology and includes selected tumour-like lesions and conditions. A guide to differences in morphology codes between the second and third

editions is provided in the final section, which includes lists of all new code numbers, new terms and synonyms added to existing code definitions, terms that changed morphology code, terms for conditions now considered malignant, deleted terms, and terms that changed behaviour code.

These guidelines have been approved by the four organizations that make up the Cooperating Parties for the ICD-10-CM: the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), CMS, and NCHS. These guidelines are a set

of rules that have been developed to accompany and complement the official conventions and instructions provided within the ICD-10-CM itself. The instructions and conventions of the classification take precedence over guidelines. These guidelines are based on the coding and sequencing instructions in the Tabular List and Alphabetic Index of ICD-10-CM, but provide additional instruction. Adherence to these guidelines when assigning ICD-10-CM diagnosis codes is required under the Health Insurance Portability and Accountability Act (HIPAA). The diagnosis codes (Tabular List and Alphabetic Index) have been adopted under HIPAA for all healthcare settings. A joint effort

between the healthcare provider and the coder is essential to achieve complete and accurate documentation, code assignment, and reporting of diagnoses and procedures. These guidelines have been developed to assist both the healthcare provider and the coder in identifying those diagnoses that are to be reported. The importance of consistent, complete documentation in the medical record cannot be overemphasized. Without such documentation accurate coding cannot be achieved. The entire record should be reviewed to determine the specific reason for the encounter and the conditions treated.

Permits the coding of all

Page 25/30

neoplasms by topography, histology (morphology) and behavior.

CPT® 2021 Professional Edition is the definitive AMA-authored resource to help health care professionals correctly report and bill medical procedures and services. Providers want accurate reimbursement. Payers want efficient claims processing. Since the CPT® code set is a dynamic, everchanging standard, an outdated codebook does not suffice. Correct reporting and billing of medical procedures and services begins with CPT® 2021 Professional Edition. Only the AMA, with the help of physicians and other experts in the health care community, creates and

maintains the CPT code set. No other publisher can claim that. No other codebook can provide the official guidelines to code medical services and procedures properly. FEATURES AND BENEFITS The CPT® 2021 Professional Edition codebook covers hundreds of code, guideline and text changes and features: CPT® Changes, CPT® Assistant, and Clinical Examples in Radiology citations -- provides cross-referenced information in popular AMA resources that can enhance your understanding of the CPT code set E/M 2021 code changes - gives guidelines on the updated codes for office or other outpatient and prolonged services section incorporated A comprehensive index -- aids you

in locating codes related to a specific procedure, service, anatomic site, condition, synonym, eponym or abbreviation to allow for a clearer, quicker search Anatomical and procedural illustrations -- help improve coding accuracy and understanding of the anatomy and procedures being discussed Coding tips throughout each section -- improve your understanding of the nuances of the code set Enhanced codebook table of contents -- allows users to perform a quick search of the codebook's entire content without being in a specific section Section-specific table of contents -- provides users with a tool to navigate more effectively through each section's codes Summary of

additions, deletions and revisions -- provides a quick reference to 2020 changes without having to refer to previous editions Multiple appendices -- offer quick reference to additional information and resources that cover such topics as modifiers, clinical examples, add-on codes, vascular families, multianalyte assays and telemedicine services Comprehensive E/M code selection tables -- aid physicians and coders in assigning the most appropriate evaluation and management codes Adhesive section tabs -- allow you to flag those sections and pages most relevant to your work More full color procedural illustrations Notes pages at the end of every code set section and subsection

CPT(R) 2020 Professional Edition is the definitive AMA-authored resource to help health care professionals correctly report and bill medical procedures and services.
