Prehospital Trauma Life Support (PHTLS) revised reprint, is a unique, continuing education program that directly addresses trauma issues in the prehospital environment. Following the publication cycle of ATLS (Advanced Trauma Life Support) by the Committee on Trauma of the American College of Surgeons, the PHTLS program is designed to enhance and increase knowledge and skill in delivering trauma care. This revised fifth edition of the PHTLS textbook is the required book for the PHTLS course, and is also ideal for use as the trauma component of a paramedic course or as a general reference book on trauma assessment and management. It combines both basic and advanced trauma concepts and skills in one definitive resource and now features an entirely new chapter on evidence-based guidelines for military medicine, developed by the Committee on Tactical Combat Casualty Care. PLEASE NOTE: The Instructor's Manual and Slide Set are available for certified PHTLS Instructors ONLY. They are ordered through Mosby but customers must first obtain an "access code" from the National PHTLS office - (800) 94-PHTLS or (601) 924-7744. Individuals may also call the above numbers for information on HOW TO BECOME A PHTLS INSTRUCTOR. PHTLS Course Features: Provides CEUs for First Responders, EMTs, paramedics, nurses, & physicians; Proceeds from the course go to the NAEMT and thus are used to support the profession; It improves the quality of care (Research is available); Can be incorporated into initial training or as a stand-alone continuing education course; Promotes critical thinking as the foundation for providing quality care. PHTLS (Prehospital Trauma Life Support) is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. The PHTLS textbook is the required book for official PHTLS courses. However, it can also be used outside of the course, adopted or purchased as a stand-alone textbook or reference book. This one book covers both basic and advanced level training. More information on kinematics than any similar book on the market. Airway, Thoracic and Spinal Skills are presented in a heavily illustrated, step-by-step format. Consistent approach! Each body region chapter features info on anatomy and physiology, pathophysiology, assessment and management giving the reader a systematic way of looking at trauma. Chapter pedagogy includes: objectives, opening case scenario and scenario conclusion at the end of chapter, summary, review questions. Features a separate chapter on trauma care for the Military. NEW TO THE REVISED 5TH EDITION: UPDATED and EXPANDED chapter on Military Medicine to reflect the new evidence based guidelines for prehospital care in the tactical environment. This new content was developed in 2002 by the Committee on Tactical Combat Casualty Care, comprised of trauma specialists, operational medical officers, and combat medical personnel. NEW TO THE 5TH EDITION: NEW! A Companion CD-ROM is now included with every book. Contains video clips of all different airway and spinal skills used in PHTLS. Also includes info to download onto a PDA (such as the Glasgow Coma Scale, Revised Trauma Score, Rule of 9's, Parkland Formula and Pediatric Vital Signs). NEW! Chapter on Injury Prevention. Provides the reader with information on preventing injuries within their community. NEW! Chapter on Triage, Transport and Trauma Systems. Provides the reader with a "pull it all together" concept of how to triage a trauma patient, how and when to transport a trauma patient and where to transport a trauma patient. NEW! Chapter on the Golden Principles of Prehospital Trauma Care. Provides the reader with guidelines to put all the information together and critically think through every trauma patient. NEW! Information on prolonged transportation. NEW! References for every chapter and suggested reading lists. Providing evidence based prehospital trauma care. NEW! Drug table for commonly used drugs for pharmacologically assisted intubation. Provides general guidelines of current accepted drug use for

intubation. NEW! Spinal Immobilization algorithm. Provides general guidelines for when spinal immobilization is appropriate for a trauma patient. ALL NEW PHOTOS! An entirely new set of photographs for the skills portion of this text. NEW! Face to Face Intubation is a procedure that provides advanced providers with an alternative method of intubating a trauma patient. NEW SPINAL SKILLS! - 2 person technique for standing longboard application and 2-person rapid extrication. Revised - Head Trauma chapter. Expanded coverage of the pathophysiology of secondary brain injury. Expanded coverage of the management of traumatic brain injury. Also now includes information on management of brain injury during prolonged transportation. Revised: Shock chapter. Now provides information on the complications of shock, expanded coverage on the assessment and confounding factors that contribute to shock, specific guidelines for appropriate use of the Pneumatic Antishock Garment (PASG), and more. Expanded! The Patient Assessment and Management chapter now includes expanded information on hemorrhage control and evaluating level of consciousness at the scene, pain management and assessing of domestic abuse. Expanded! Chapter on trauma in the elderly. Expanded coverage on the systematic effects of aging, the common mechanisms of injury in the elderly and special considerations in the management of the elderly in an ABCDE approach. COMPANION CD-ROM: Includes video presentations of more than 20 skills being performed in "real-time." These skills include: Airway Maneuvers, Dual Lumen Device insertion, Endotracheal Intubation (traditional, face-to-face, nasal), Helmet Removal techniques, Rapid Extrication (2 person and +2person), Standing Longboard Application (2 person and +2 person), and more!

As the required textbook for NAEMTUs worldwide prehospital trauma life support courses, this is the definitive resource for learning basic and advanced prehospital trauma skills and concepts. Now revised and expanded to cover all aspects of military prehospital trauma with 12 new chapters, this edition is tailored expressly for the military.

The PREHOSPITAL TRAUMA LIFE SUPPORT (PHTLS) course is a unique continuing education program created from the real need in EMS education for additional training in the handling of trauma patients. The course and the book, PREHOSPITAL TRAUMA LIFE SUPPORT, educate EMS personnel to identify, stabilize, treat, and transport trauma patients with the highest level of care. Prehospital patients who are stabilized and then quickly transported to an appropriate medical facility have the best chance of survival. Identifying the mechanism of injury, interpreting signs and symptoms, understanding pathophysiology, recognizing life-threatening injuries, and honing assessment skills all help the EMT to identify a trauma patient with multiple injuries and perform appropriate interventions. PHTLS treats the trauma patient as a special entity, with needs that differ from those of other patients. Provides the most current information available through revised and updated chapters which adhere to the new 1998 ATLS guidelines. Features comprehensive coverage for both basic and advanced level training. Emphasizes the foundation of trauma care, specifically understanding the mechanism of injury. Includes in-depth coverage of anatomy and physiology, pathophysiology, assessment and management of trauma to key body systems and regions. Covers special patient populations, including pediatrics, geriatrics and pregnant patients, to refresh the EMT regarding the importance of understanding the differences in physiology and presentation in these special populations. Contains an entire chapter devoted to trauma care in the military, because prehospital care in military situations is indisputably different than most civilian trauma situations. Promotes clear, practical understanding of the proper procedures for airway and spine skills with separate chapters that outline techniques and procedures with photos alongside text in a step-by-step format. Includes chapter objectives, summary, and review questions to help the student self-assess and pick out key points from the material. Includes case scenarios and conclusions to promote critical thinking and allow the student to see real application of the concepts discussed in each chapter. Provides a comprehensive glossary and bibliography to direct the reader when further study on a particular topic is desired. Incorporates more than 300 full-color illustrations, many updated and enlarged from previous edition, to aid in visual learning, comprehension of material, explanation of difficult concepts, and keep reader's interest.

As the required textbook for NAEMT's worldwide prehospital trauma life support course, Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. Fully revised and updated, the 7th edition provides state-of-the-art, evidence-based trauma treatment and guidelines that are proven to reduce morbidity and mortality. Tailored expressly for the military environment, this book diverges in the last 12 chapters to reflect the special considerations of the military. These unique chapters are written by the Tactical Combat Casualty Care Committee on Trauma, the leading body that oversees trauma care. The Instructor's Electronic Resource CD-ROM is available for certified PHTLS instructors only. It can be ordered through Elsevier/MosbyJems, but customers must first obtain an access code from the National PHTLS office at 1-800-94-PHTLS or 1-601-924-7744. Individuals may also call the above numbers for information on How to Become a PHTLS Instructor. Provides CEUs for military prehospital care providers, first responders, EMTs, paramedics, nurses, and physicians; proceeds from the course go to the NAEMT and are used to support the profession; helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. PHTLS is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential airway, thoracic, and spinal skills. Each chapter details important prolonged transportation guidelines. Includes more information on kinematics than any similar book on the market. A consistent approach for every body system makes it easy to reference key content on anatomy and physiology, pathophysiology, and assessment and management. Chapter Objectives and closing Summaries break down must-know information for each chapter. Two Environmental Trauma chapters provide response protocols for a wide variety of environmental emergencies. Wilderness Trauma Care chapter helps you confidently treat trauma patients in wilderness situations and includes information on extended transport times. Civilian Tactical EMS chapter details steps you can take to support police operations, promote crime scene awareness, and apply PHTLS concepts to civilian tactical settings. Burns chapter guides you through the treatment of burn trauma patients. Three new Military Medicine chapters add to coverage for the military environment: Joint Theater Trauma System, Treatment of Burn Casualties in TCCC, and TCCC Casualty Response Planning. More than 30 video demonstrations on the companion DVD provide step-by-step procedural guidance for key skills, including 20 fully re-shot demonstrations and four brand-new skills for King Airway, Sitting Immobilization (Vest Type), Cervical Collar Sizing and Application, and Needle Cricothyrotomy; subtitles are available in eight languages (Danish, Dutch, English, French, Portuguese, Spanish, German, and Chinese (Mandarin)). Extensively updated photos clarify key concepts and techniques. New Art and Science of Medicine chapter helps you build the critical thinking skills to determine the best way to manage trauma patients based on each individual situation and condition. Expanded chapter on Explosives and Other Weapons of Mass Destruction outlines essential steps for responding to accidents involving biological, nuclear, incendiary, chemical, or explosive agents. Updated Disaster Management chapter details the latest management techniques and protocols. All-new Scenarios and Scenario Solutions challenge you to apply treatment concepts to realistic situations you may encounter in the field. Enhanced organization reflects the most up-to-date research and mirrors the content and presentation of the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th Edition course.

PHTLS: Prehospital Trauma Life Support, Military Edition consists of the PHTLS core content and features thirteen chapters written by military prehospital trauma care experts for practitioners in the military environment. PHTLS: Prehospital Trauma Life Support, Military Edition is created in partnership between the National Association of Emergency Medical Technicians (NAEMT) and the Committee on Tactical Combat Casualty Care (C-TCCC). Since 1996, TCCC has improved the care rendered in combat prehospital environments. TCCC is the battlefield prehospital component of the Joint Trauma System, an organization within the United States Department of Defense that projects combat trauma care out to the point of injury and continues that care seamlessly while bringing the casualty home for recuperation and rehabilitation. TCCC guidelines are continuously revised and updated by C-TCCC, an all-volunteer group of military medicine and trauma care specialists. The membership of C-TCCC includes combat medics, corpsmen, and pararescuemen as well as physicians and physician assistants.

"Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. This textbook will now serve as a primary reference text for PHTLS courses, accompanied by a course manual. Fully revised and updated, the ninth edition provides trauma treatment and guidelines that are proven to reduce morbidity and mortality. Market Information: Appropriate for first responders"--

The only textbook approved for use by NAEMT's Advanced Medical Life Support course, this guide provides comprehensive, evidence-based coverage of basic and advanced concepts with an emphasis on critical thinking, leading to better outcomes for patients. Submit your application to become a Course Site today.

KEY FEATURES This textbook will contain all material from PHTLS, 7e that is relevant for those first on scene at a traumatic event. Provides CEUs for First Responders, EMTs, paramedics, nurses, & physicians; proceeds from the course go to the NAEMT and are used to support the profession; it improves the quality of care (research is available); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. PHTLS Trauma First Response is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT). One book covers ALL aspects of prehospital trauma including first-responder-level training on the fundamental knowledge of how to identify mechanisms of injury, recognize life-threatening injuries, assess and manage trauma patients, perform appropriate first-responder-level interventions, and more. Skills are presented in a heavily illustrated, step-by-step format that is easy to learn and understand. Each chapter begins with one or more scenarios with scenario solutions that allow for real-world application of the chapter's content. Evidence-based information ensures that students have the most up-to-date content available. More information on kinematics than any similar book on the market. A consistent approach makes the book easy to follow. Chapter Objectives and closing Summaries present must-know information for each chapter for quick reference and learning reinforcement. A comprehensive Environmental and Wilderness chapter offers detailed information on these key topics. Burns chapter provides an in-depth view of burn trauma patients. Heavily illustrated to aid students in understanding key concepts and techniques. Disaster Management chapter includes techniques and protocols for the evolving specialty of disaster management. Chapters are consistent with the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th edition and course. ATLS is the parent course for PHTLS. Heavily referenced to reflect recent medical literature and consensus documents/ position papers, showing that PHTLS Trauma First Response is evidence-based and accurate.

This is a Pageburst digital textbook; As the required textbook for NAEMT's Trauma First Response course, PHTLS Trauma First Response provides comprehensive, evidence-based trauma guidelines to help you confidently manage trauma patients in the critical moments before EMS arrives on the scene. Culled from the most current, evidence-based trauma treatment guidelines published in NAEMT's internationally

renowned Prehospital Trauma Life Support (PHTLS), 7th Edition, this proven approach to trauma management can assist you in providing the best pre-EMS trauma treatment to reduce patient morbidity and mortality. Provides CEUs for First Responders; proceeds from the course go to the NAEMT and are used to support the EMS profession; helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. Trauma First Response is a one-day continuing education course that teaches the principles of the world-renowned Prehospital Trauma Life Support (PHTLS) course to those who haven't had advanced prehospital training, including first responders, police officers, firefighters, rescue personnel and safety officers. The lectures and practical stations are designed for the type of care non-EMS first responders can render to trauma patients while awaiting EMS patient transport or when assisting paramedics and EMTs at a trauma scene. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital and first-response-level trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential skills, including: Identifying mechanisms of injury Recognizing life-threatening injuries Assessing and managing trauma patients Performing appropriate first-responder-level interventions Scenarios and Scenario Solutions in each chapter challenge you to apply treatment concepts to realistic situations you may encounter in the field. Includes more information on kinematics than any similar book on the market. A consistent approach helps you easily reference key content. Chapter Objectives and closing Summaries break down must-know information for each chapter. Burn Trauma chapter guides you through the treatment of burn trauma patients. Disaster Management chapter details the latest management techniques and protocols.
