The roles and responsibilities of administrative managers are identified and explained in this updated and comprehensive resource on managing the information needs of an organization to facilitate timely, relevant, and accurate communication. Topical case studies and practical examples illustrate the knowledge and skills required for success in office management. Whether managing cultural diversity in the work place or learning proper business ethics, the instructions outlined in this guide provide the basis for arriving at meaningful decisions that can make a candidate an asset in any office environment.

An entrepreneurial and managerial approach. Continual increases in wealth and leisure time have given a sharp rise to tourism, which resulted in the rapid development of tourism - related ventures such as hotels, bed and breakfast accommodation, travel agencies, restaurants, theme parks, event companies, resorts, tourist guides and tour operators, to mention a few. "New Tourism Ventures: An Entrepreneurial and Managerial Approach" provides a definitive grounding of how to create and manage such tourism ventures. It takes an entrepreneurial and managerial approach to the subject, underpinning the various concepts associated with entrepreneurship and demonstrating the linkages of the subject with the tourism economy within the

context of international best practice and research.

This work includes a thorough treatment of the roles of our organizational culture and leadership that provide the seedbed for quality work life. The values encapsulated in the organizational value structure will determine the way operations are conducted. The operational conditions deal with the creation of a safe, healthy and motivating environment. Management is fast becoming of vital importance in all industries but particularly in mining and manufacturing. Quality of work life is not the sole responsibility of an organization and its management structures. The individual must accept part of the responsibility. This book provides extensive guidance on issues such as preparation to deal with change through the development of transformational intelligence, self-management skills and personal financial management. This book is the among the first in South Africa and one of few in the world to provide a holistic overview of the creation, development and maintenance of quality of work life (QWLO) in organizations.

Monika Futschik introduces an evaluation model that allows a holistic assessment of the advantages and disadvantages of electronic batch recording solutions versus traditional paper batch ticket solutions. In comparison to former studies, this newly developed evaluation model considers the change management efforts and the financial investments required for system deployment. The model proves the overall performance value through the implementation of electronic batch recording solutions and supports decision-makers in finding the most effective solution. The development and effectiveness of this model is based on various surveys, expert interviews, a Delphi study as well as a case study with

a real-life pharmaceutical company. The outcome of her research can be easily applied to other industries as well.

'Reinventing the Information Technology Department' is both anecdotal and informal but deals with a subject which is of vital interest to Chief Information Officers and IT Managers, addressing questions such as: * How does the IT department keep pace with business change? * How do we provide stable and responsive IT platforms? * How do we add recognised value to the organisation? * How do I reinvent my department? * How do I get onto the board? It offers an alternative view of the new roles of the in-house IT function and proposes a rethink about IT services within companies, suggesting a self-help approach to redefining/reinventing in-house IT for CIOs. The author explains that new modes of business thinking and operation are essential if a company is to succeed in the near future and in light of this covers topics such as self-organising systems, knowledge management, multi-stakeholder perspectives, and empowerment initiatives in relation to the overall business and in particular the IT function. Each chapter contains implementation templates for the readers to take themselves through the repositioning or reengineering of the IT function and their own departments.

The Science of Making Money has existed for thousands of years. Historic texts indicate how successful and wealthy people of ancient times used this science to accumulate wealth. Today, successful and wealthy people are still using this science to make money. Just as the science of aeronautics is based on the indisputable Law of Lift, this book outlines the scientific way of making money, based on the indisputable Law of Making Money. Study this science. Beging to make money with greater awareness, without any

guesswork.

Compiled and written by people who participated in one way or another in the experience of democratic consolidation, this account documents the dynamics of local government transformation and captures the key themes of the debates about policy options, lessons, and key strategic decisions. Aiming to ensure that municipalities play a key role in creating more democratic, non-racial, equitable, and sustainable communities, towns and cities, this volume raises critical questions about the kinds of challenges that all those involved with the future of local governance will face in the years ahead. This text will be an indispensable resource for government officials, students, researchers, and community leaders alike.
