Chemical education is essential to everybody because it deals with ideas that play major roles in personal, social, and economic decisions. This book is based on three principles: that all aspects of chemical education should be associated with research;

This book aims to posit
theory as a central
component to the study
of education and
education policy.

Providing clear,

introductory entries into contemporary critical theories and their take up in education policy studies, the book offers a generative invitation to further reading, thought and exploration. Instead of prescribing how theory should be used, the contributors elaborate on a set of possibilities for researching and

the importance of theory

ideas. Organized around

two parts, the first section

focuses on theorists while

the second section looks
