This practical text provides step-by-step, hands-on instruction in using Harris CareTracker, a fully integrated, CCHIT and ONC-ATCB certified Practice Management and Electronic Health Record (EHR) solution. This unique instructional package combines an engaging, reader-friendly text with online access to the Harris CareTracker system, enabling students to learn the features, functions, and workflows of administrative, practice management, clinical, and billing activities using a live electronic medical record (EMR) program. In addition to connecting essential EHR concepts to real-world scenarios and tools, the authors link knowledge and activities to the CEHRS credential, with CEHRS Exam Connections highlighted throughout the text. Chapters emphasize key topics such as patient demographics and registration, appointment scheduling, EMR clinical duties, and administrative tasks including billing and collections. For additional context, numerous applied learning Case Studies provide valuable perspective and feature relevant activities and exercises to help prepare students for professional success in this dynamic, rapidly growing field. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This text explains the \"ins and outs\" of the popular, online system medical offices use for patient billing and medical records management, giving you the confidence it takes to master administrative work in any health care setting. Then, when you access the Harris CareTracker online system, you'll work with live electronic medical records (EMR) to conquer features and functions, and execute important daily tasks such as patient registrations and scheduling, billing and collections, clinical duties, and more. Even better, the second edition offers self-testing features and cases studies to give you practice solving common problems, putting you in the driver's seat, no matter what comes your way -- Provided by the publisher.

The student workbook helps you retain key chapter content. A pared-down version of the comprehensive textbook, the workbooks includes only the step-by-step activities and no other explanations. The activities allow you to practice using administrative, practice management, clinical, billing, and coding functions in the Harris CareTracker tool.

The Billers and Coders workbook helps you understand and remember important facts and information about financial activities performed within the electronic health record. Expanded activities give you extra practice with these challenging topics.

The second edition of THE PAPERLESS MEDICAL OFFICE: USING HARRIS CARETRACKER accelerates progress with Harris CareTracker, a fully integrated, CCHIT and ONC-ATCB certified Practice Management and Electronic Health Record (EHR) tool. Combining a reader-friendly text with online access to a live electronic medical record system, this student-centered approach builds confidence by working through actual office tasks in the system, solving problems common in health care settings, and testing knowledge with case studies and exercises. Hands-on activities develop essential skills in patient scheduling and registration, billing and collections, clinical record keeping, and the administrative tasks medical offices want in new hires. A complete learning approach that empowers students to lean forward, THE PAPERLESS MEDICAL OFFICE: USING HARRIS CARETRACKER transforms users into experts before they start their first job! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
