The first book ever written on the National Security Agency from the New York Times bestselling author of Body of Secrets and The Shadow Factory. In this groundbreaking, award-winning book, James Bamford traces the NSA's origins, details its inner workings, and explores its far-flung operations. He describes the city of fifty thousand people and nearly twenty buildings that is the Fort Meade headquarters of the NSA where there are close to a dozen underground acres of computers, where a significant part of the world's communications are monitored, and where reports from a number of super-sophisticated satellite eavesdropping systems are analyzed. He also gives a detailed account of NSA's complex network of listening posts both in the United States and throughout much of the rest of the world. When a Soviet general picks up his car telephone to call headquarters, when a New York businessman wires his branch in London, when a Chinese trade official makes an overseas call, when the British Admiralty urgently wants to know the plans and movements of Argentina's fleet in the South Atlantic all of these messages become NSA targets. James Bamford's illuminating book reveals how NSA's mission of Signals Intelligence (SIGINT) has made the human espionage agent almost a romantic figure of the past. Winner Best Investigative Book of the Year Award from Investigative Reporters & Editors "The Puzzle Palace has the feel of an artifact, the darkly revealing kind. Though published during the Reagan years, the book is coolly subversive and powerfully prescient." The New Yorker "Mr. Bamford has emerged with everything except the combination to the director's safe." The New York Times Book Review

In this remarkable tour de force of investigative reporting, James Bamford exposes the inner workings of America's largest, most secretive, and arguably most intrusive intelligence agency. The NSA has long eluded public scrutiny, but The Puzzle Palace penetrates its vast network of power and unmasks the people who control it, often with shocking disregard for the law. With detailed information on the NSA's secret role in the Korean Airlines disaster, Iran-Contra, the first Gulf War, and other major world events of the 80s and 90s, this is a brilliant account of the use and abuse of technological espionage.

The National Security Agency is the world's most powerful, most far-reaching espionage. Now with a new afterword describing the security lapses that preceded the attacks of September 11, 2001, Body of Secrets takes us to the inner sanctum of America's spy world. In the follow-up to his bestselling Puzzle Palace, James Bamford reveals the NSA's hidden role in the most volatile world events of the past, and its desperate scramble to meet the frightening challenges of today and tomorrow. Here is a scrupulously documented account much of which is based on unprecedented access to previously undisclosed documents of the agency's tireless hunt for intelligence on enemies and allies alike. Body of secrets is a riveting analysis of this most clandestine of agencies, a major work of history and investigative journalism. A New York Times Notable Book

A follow-up to The Puzzle Palace and Body of Secrets looks at the National Security Agency in the wake of September 11th, its role in the Bush administration's controversial domestic wiretapping program, and its ongoing search for information about America's elusive enemies. 125,000 first printing.

Presents a history of the agency, from its inception in 1945, to its role in the Cold War, to its controversial advisory position at the time of the Bush administration's search for weapons of mass destruction in Iraq, shortly before the invasion of 2003.

A Pretext for War reveals the systematic weaknesses behind the failure to detect or prevent the 9/11 attacks, and details the Bush administration's subsequent misuse of intelligence to sell preemptive war to the American people. Filled with unprecedented revelations, from the sites of "undisclosed locations" to the actual sources of America's Middle East policy, A Pretext for War is essential reading for anyone concerned about the security of the United States. Acclaimed author James Bamford whose classic book The Puzzle Palace first revealed the existence of the National Security Agency draws on his unparalleled access to top intelligence sources to produce a devastating expose of the intelligence community and the Bush administration.

To most Americans, the NSA is an organization shrouded in secrecy, where the most clandestine of operations are carried out in the name of national security. Dr. Thomas Willemain, successful software entrepreneur and statistics professor, spent the equivalent of three years alternating between his life "outside" and working "inside" at the NSA and an affiliated, shadowy think tank. Once inside, Dr. Willemain would be challenged to adjust to life in an intense, complex and sometimes alien organization, while also encountering brilliant and quirky colleagues, the moral challenges of wielding math and statistics as weapons, a charming (if kitschy) gift shop, and ultimately, some of the most rewarding time of his career. A deeply personal account of the years spent within the most secretive organization in the world, Working on the Dark Side of the Moon explores the range of emotions an outsider experiences while crossing over to the "inside." It also shows the positive side of an Agency whose secrecy hides dedicated men and women devoted to protecting the country while honoring the Constitution. Thomas Reed Willemain received the BSE (summa cum laude) from Princeton University and the PhD from Massachusetts Institute of Technology. His academic career has included faculty positions at M.I.T., Harvard's Kennedy School, and Rensselaer Polytechnic Institute, where he is Professor Emeritus of Industrial and Systems Engineering. He is also a founder and Senior Vice President at Smart Software, Inc. in Boston. He served in the Intelligence Community as an Expert Statistical Consultant at the National Security Agency and as a member of the research staff at the Institute for Defense Analyses/Center for Computing Sciences.

From the #1 New York Times bestselling creators of Op-Center comes a different kind of law enforcement. In the year 2100, computers are the new superpowers. Those who control them control the world. To enforce the Net Laws, Congress creates the ultimate computer security agency within the FBI: Net Force®. Minor viruses are eating away at the Net Force computers. The e-mail shut-downs and flickering monitors are hardly emergencies but they've been keeping the tech department hopping. Same with the sudden rash of time-consuming lawsuits. No one in Net Force has a moment to spare, which is exactly the way Mitchell Townsend Ames wants it. Because when the shadowy mastermind launches his master plan, he wants Net Force to be looking the other way!
