When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I

was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

In today's business world, there is an enormous gap between how leaders are supposed to act versus how they actually act. As a leader, where do you fall on the spectrum? In his debut book, John Slone teaches readers about discovering one's Hidden You and using it to become the best leader possible. Before you can successfully lead others, you must first discover both the physiological and psychological attributes that make you, you. Every leader needs a systematic approach to successfully lead while taking into consideration the complexities of human behavior and the innate survival instincts that are consciously and subconsciously invoked in every human interaction. Only by understanding this can you begin your leadership evolution and embark on a journey toward leadership transcendence.
