It explains in practical terms how to use today's digital tools to achieve the secret of good design: well set type. An essential reference for anyone who works with type: designers, print production professionals, and corporate communications managers can go to straight to the index to find focused answers to specific questions, while educators and students can read it as a text book from cover to cover.

There was a time, as recently as the 1980s, when storefronts, murals, banners, barn signs, billboards, and even street signs were all hand-lettered with brush and paint. But, like many skilled trades, the sign industry has been overrun by the techno-fueled promise of quicker and cheaper. The resulting proliferation of computer-designed, die-cut vinyl lettering and inkjet printers has ushered a creeping sameness into our visual landscape. Fortunately, there is a growing trend to seek out traditional sign painters and a renaissance in the trade. In 2010 filmmakers Faythe Levine, coauthor of Handmade Nation, and Sam Macon began documenting these dedicated practitioners, their time-honored methods, and their appreciation for quality and craftsmanship. Sign Painters, the first anecdotal history of the craft, features stories and photographs of more than two dozen sign painters working in cities throughout the United States. With a foreword by legendary artist (and former sign painter) Ed Ruscha, this vibrant book profiles sign painters young and old, from the new vanguard working solo to collaborative shops such as San Francisco's New Bohemia Signs and New York's Colossal Media s Sky High Murals.
