fertilization in theory building and applied research by examining the links between M&A and wealth creation. Each chapter covers a specific case and offers a focused clinical examination of the entire lifecycle of M&A for each mega deal, exploring all aspects of the process. The success of M&A are analyzed through two main research approaches: event studies and financial performance analyses. The event studies examine the abnormal returns to the shareholders in the period surrounding the merger announcement. The financial performance studies examine the reported financial results of acquirers before and after the acquisition to see whether financial performance has improved after merger. The relation between method of payment, premium paid and stock returns are examined. The chapters also discuss

synergies of the deal-cost and revenue synergies. Mergers and acquisitions represent a major force in modern financial and economic environment. Whether in times of boom or bust, M&As have emerged as a compelling strategy for growth. The biggest companies of modern day have all taken form through a series of restructuring activities like multiple mergers. Acquisitions continue to remain as the quickest route companies take to operate in new markets and to add new capabilities and resources. The cases covered in this book highlights high profile M&As and focuses on the wealth creation for shareholders of acquirer and target firms as a financial assessment of the merger ' s success. The book should be useful for finance professionals, corporate planners, strategists, and managers.

As a country on the way to integration with the European Union (EU), Turkey has been following EU principles in establishing and improving its merger control regime, as well as overall competition law, keeping pace with changes in relevant EU legislation and case law. However, as is to be expected, specific adjustment needs engender significant differences in the two regimes. This book presents, for the first time, a description and analysis of the relationship between the EU and Turkish merger control law and practice. The authors—all three both practicing lawyers and academicians in Turkey—focus on comparing substantive, procedural and jurisdictional issues and draw parallels on their regulation in the two jurisdictions. These matters

include the following: determining whether a transaction shall be regarded as a notifiable merger, hence be subject to control; financial thresholds used for allocating jurisdictions; extraterritoriality of merger control; relationship between the significant impediment to effective competition (SIEC) test and the dominance test; determination of the relevant market; techniques used for assessment of horizontal and non-horizontal mergers; notification requirements; procedural duties of competition authorities in relation to remedies; third-party rights; gun-jumping fines and other sanctions for failure to comply with merger control requirements; and peculiarities of assessment of mergers in the big data world. Each chapter provides an overview of the respective issues in the EU and Turkey, projecting a clear

understanding of the main similarities and differences in the two regimes. A notable feature is an in-depth analysis of applicable case law concerning each issue, with most of the Turkish decisions available in English for the first time. In addition to these practical issues, the book 's comparative approach will prove to be of great value. With its clear answers to questions about what transactions are subject to merger control, what criteria are used in assessing those transactions, and the main issues that a foreign company should be aware of while merging with another foreign company with effect in Turkey and/or EU, the book will be of immeasurable value for lawyers and their business clients dealing with multijurisdictional merger cases. With the resources of both governments and traditional philanthropy barely growing or in decline, yet the problems of poverty, ill-health and environmental degradation ballooning daily, it is increasingly clear that new models for financing and promoting social and environmental objectives have become urgently needed. Fortunately, however, a

significant revolution appears to be underway in the way in which social and environmental purposes are being financed. The heart of this revolution is a massive explosion in the instruments and institutions being deployed to mobilize private resources in support of social and environmental objectives. Where earlier such support was limited to charitable gifts, now a bewildering array of new instruments and institutions has surfaced-loans, loan guarantees, private equity, barter arrangements, social stock exchanges, bonds, secondary markets, investment funds, and many more-all of them designed to leverage not just the tens of billions of dollars of philanthropic grants but the hundreds of billions, indeed trillions, of dollars of private investment capital. While the changes under way are inspiring and by no means

trivial, however, they remain largely uncharted in any systematic fashion. This monograph, and of the companion volume for which it also serves as the introductory chapter, is designed to overcome this problem, to provide the first comprehensible and accessible roadmap to the full range of important new developments taking place on the frontiers of philanthropy and social investment. In the process, it seeks to broaden awareness of these developments, increase their credence and traction, and make it possible to maximize the benefits they can generate while acknowledging the limitations and challenges they also face.
