Pura vida is the discovery of a Spanish-speaking world through the experiences of real people who share anecdotes and reflections on those experiences. Students relate to these people and make deeper, more meaningful connections between language and culture, and acquire Spanish with an unparalleled sense of personal engagement. Students must learn to become proficient at approaching new situations methodically, based on a repertoire of skills. These skills are vital for successful problem solving in organic chemistry. Existing textbooks provide extensive coverage of the principles but there is far less emphasis on the skills needed to actually solve problems.
